

DP-610

A premium cerium oxide polishing powder formulation designed for high removal rates on traditional precision optics, including ophthalmic lenses, filter glass, prisms, and glass molds. Easily dispersed, with high removal rate, high surface quality, and long life.

Parameters	Typical Values
CeO ₂ /TREO	> 80%
D50	1.8 - 2.5μm
D97	< 12μm
Suspension	Yes
pH	7 - 10
Recommended polishing concentration	5 – 15° Baume
	1.036 – 1.115g/ml
Package	20Kg per carton
