

# DP-611

A premium cerium oxide polishing powder formulation, with a finer particle size to maintain good removal, but at higher surface quality with no scratch. Designed for polishing traditional precision optics, including ophthalmic lenses, filter glass, prisms, and glass molds. Easily dispersed, good removal rate, higher surface quality, and long life.

Parameters	Typical Values
CeO <sub>2</sub> /TREO	>80%
D50	0.7 – 1.2μm
D97	<8μm
Suspension	Yes
pH	7 - 10
Recommended polishing concentration	5 – 15° Baume
	1.036 – 1.115g/ml
Package	20Kg per carton
